

The world's finest tape recorder deserves the world's most precise NAB adapters.

Available colors: Black Satin

Blue Steel

Radiant Red

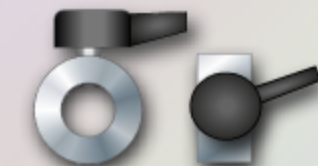

Precision machined 6061-T6 aluminum alloy - finished in choice of bright anodized colors & laser engraved. For 1/4", 1/2" & 1" tape widths*.

Radial & axial runout guaranteed within .003" TIR

Primary drive pin is 1.5" stainless steel and extends 1/2" below the turntable platter for worry free high speed wind.

Stainless steel ball detents capture reels and provide DYNAMIC reel centering. No clamps - nothing to lift or twist. Snap the reels on & lift the reels off - it's really that easy!

NAB drive pins (3) are case hardened steel in black "no-rust" finish - ain't no plastic parts anywhere!

Included MagLock collar clamps provide security & easy removal of adapters.

*Add versatility with optional 1/4" spacers. Use to support 1" & optimize handling of 1/2" reels. Precision machined 6061-T6 aluminum alloy in Black Satin.

SET COMPLETE includes (2) discounted spacers or buy separately online when needed.

Minimize wow & flutter, improve wind & pack, simplify reel changes, and add a great look!

MagREELS™

Designed to make a difference

Precision NAB adapter set for the AMPEX ATR-100
Built in the USA by MDI PrecisionMotorWorks, Hudson, MA

Colors are reliable approximations of actual anodized finishes. MagREELS are not intended for use with vertically rack mounted recorders. Prices subject to change without notice.
