Invisible Man, Nashville  
MetalWorks, Ontario  
Quad Recording, NYC  
Record One, Sherman Oaks, CA  
The Record Plant, Hollywood  
Royaltone, N. Hollywood  
Soundtrack, NYC

The miniature motors which position your faders are doing a difficult job - operating under extremely demanding conditions. As a result, there is a significant motor failure rate in the P & G "ULTIMATION" fader, leaving many with faders which cease to "ULTIMATE" often at the most inopportune times. The most common failure mode, whereby the shaft detaches from the rotor, is the unfortunate result of continuous hard starting and instant reversing.

Over time, the original motors simply can't stand up to their difficult task. At PrecisionMotorWorks, we've solved this problem with a powerful, more robust motor; offering longer life at lower replacement cost.

The ULTIMOTOR is a "plug-in" replacement which can get your facility back up in minutes - not weeks! Our improved, direct replacement motor, has made "in the field" replacement a simple task. The wait and downtime associated with tearing apart the console to "send out" for faders and/or motors is not something you need put up with any longer.

- Lower replacement costs.
- 33% greater motor shaft diameter than OEM motor.
- Nearly 50% stronger at the shaft/rotor interface.
- Supplied fully assembled w/mounting plate, threaded capstan, replacement thread, and easy to follow instructions.
- 1 full year Repair or Replacement Warranty.

Products for Audio, Video & Film

## Moving Fader Motors

**Part # UL.134666.MTR**

Qty.	Price
1-2	\$154.95
3-9	\$139.45
10-19	\$131.70
20+	\$123.96

We will install motors in your fader cassettes.  
\$45.00 per unit for installation. Prices subject  
to change. Call for current prices.

The "ULTIMOTOR" meets or exceeds all the electrical, ballistic, and limited space requirements and, it'll keep on running! If you've got Ultimation™, you should have the ULTIMOTOR in your console, and on your shelf.
