

The best tape head, tape path cleaner money can buy!

Tape Path Cleaner

Non-Hazardous.
Non-flammable.
No flashpoint.
No Water.
No residue.

EPA & D.O.T. classified "non-hazardous".
Will not attract moisture.

Cleans, degreases and de-fluxes without
the risk of rust or corrosion.

Quickly removes the "sticky stuff" that
alcohol can't.

Rapid evaporation. Safe for use on all
magnetic heads and most elastomers.

The only product recommended and approved
to effectively and safely clean T/REDS™.

Health Hazards: HRR is an industrial chemical. We call it "environmentally preferred" because it is intended to replace products that are more hazardous, (1,1,1 trichloroethane, mineral spirits, MEK, etc.). This does not mean that HRR is completely harmless. It is strong enough to remove tough industrial soils, so it can irritate your skin. We suggest you avoid extended exposure to unprotected skin. Don't get it in your eyes, or breath large amounts of the vapor. HRR evaporates extremely fast. Used on a rag or from a spray bottle, the product can produce fumes in great quantity, (don't spray or use HRR without adequate ventilation). For more exposure and first aid information, refer to MSDS

Disposal: Straight from the bottle, HRR is not considered a hazardous waste product. Once it is contaminated with whatever you are cleaning, the resulting mixture may be considered hazardous, depending on whether or not the material you are cleaning is hazardous.

Do not use Head, Red & Roll Cleaner™ to clean surfaces without first testing for compatibility or checking with us.

Available: 4 fl.oz. - 8 fl.oz. bottle - 4 x 2 fl.oz
Discount for 3 or more of any one size. Buy online.
